

Comparing Ecosystems

Use the Venn diagram to determine which animals are found in coral reefs, mangroves, both, or neither! Use the yellow circle to organize animals who live in mangroves and the blue circle for animals that live in the coral reef. If you think an animal can live in both, write or draw the animal where the two circles overlap. If you think an animal does not live in either, draw or write the name of the animal on the outside of the circles.

Animals:

- Conch shell
- Dolphins
- Sea star
- Barnacles
- Iguana
- Pelican
- Yellowtail snapper
- Adult shark
- Juvenile shark
- Stingray
- Star coral
- Moray eel
- Angelfish
- Sea Sponge
- Sea Cucumber
- Sea fan
- A juvenile fish
